

HCC 2021 EARTH DAY

A Day of Action: Growing Gardens and Building Birdhouses

- Butterflies are located all over the world, they can be found in every continent except for Antarctica
- Butterflies pollinate by landing on flowers for nectar like bees although they are far less efficient pollinators as they don't pick up as much pollen on their long thin bodies
- Butterflies tend to go for wild flowers that are in cluster so they can better land on them, they also look for flowers with bright colors

04.21.2021 - 04.22.2021
From 11am - 3pm.
Taking place in the courtyard
at HCC.
